

**AMENDMENTS TO THE ABSTRACT:**

Please replace the paragraph (Abstract) beginning at page 44, line 1 with the following rewritten version:

**ABSTRACT**

~~In a~~ A rotary compressor ~~including~~ includes a compression mechanism ~~(20)~~ in which a piston ~~(22)~~ is disposed inside a cylinder chamber ~~(C1, C2)~~ of a cylinder. The ~~(21), the~~ cylinder ~~(21)~~ and the piston ~~(22)~~ eccentrically rotate relative to each other. The ~~, and~~ ~~furthermore the~~ cylinder chamber ~~(C1, C2)~~ is sectioned into a high pressure chamber and a low pressure chamber[[,]] in order to prevent production of vibration and noises due to pressure pulsation caused in a suction process. A ~~, a~~ low pressure space ~~(S1)~~ communicating with a suction side of the compression mechanism ~~(20)~~ and a high pressure space ~~(S2)~~ communicating with a discharge side of the compression mechanism ~~(20)~~ are formed in the casing. A ~~(10), and a~~ suction pipe ~~(14)~~ communicating with the high pressure space ~~(S1)~~ and a discharge pipe ~~(15)~~ communicating with the high pressure space ~~(S2)~~ are disposed in the casing ~~(10)~~.
